Eco homes set green standards

By **GEOFFREY HEDGE**

ghedge@nqo.com

KINGERLEE Homes, the new Oxfordshire-based eco-developer, has launched its flagship scheme of nine Eco Excellent Homes at Lincoln Grove, Bladon, Oxfordshire, offering a new benchmark for sustainable and environmentally friendly homes.

In a demonstration of its ongoing commitment to improving the energy-efficiency of its homes, Kinglerlee will monitor not only the gas, electricity and water consumption, but also the temperatures and humidity within the rooms using internal data loggers, for two years after their sale.

This important research will be carried out in conjunction with Oxford Brookes University and with the homeowner's consent, using energy meters that can be monitored with no intrusion to those living in the property. Residents will be asked to complete a weekly log.

Houses are priced at £369,000 for a two-bedroomed, two-bathroomed terraced house with a garden and £445,000 for a three-bedroomed, end of terrace home with a garden. For more details, call selling agents Kemp & Kemp on 01865 510000.
